CILT is the world's leading organisation voice for professionals in logistics, transport and supply chain. With our global community, we're creating the deeper intelligence needed for our world's future.

MESSAGE FROM CILTM PRESIDENT PROFESSOR TS DR MUHAMMAD ZALY SHAH FCILT

On 31st August 2024, as we celebrate Malaysia's Independence Day, we reflect on what it means to be truly independent. This day is more than just a historical milestone; it's a reminder of our journey from colonial control to self-determination. Our path to independence was paved with resilience, courage, and unity. In the logistics and transportation industries, independence means having the ability to control and manage our own systems, ensuring that they serve our nation's needs and ambitions. It's about creating a future where our industries are not just surviving but thriving under Malaysian leadership.

Our journey to independence from colonialism was fraught with challenges. For decades, our logistics and transportation sectors were managed by foreign entities with little regard for our national interests. However, post-independence, we took bold steps to reclaim these industries. We recognized that controlling our logistics and transportation was crucial to our sovereignty. This shift wasn't just about taking back control; it was about building an industry that reflects our values, our priorities, and our vision for the future. We transformed these sectors from mere colonial outposts into national symbols of progress and resilience.

Take Pos Malaysia, for example. Once a colonial postal service, it has grown into a formidable player in the logistics business under Malaysian stewardship. After independence, Pos Malaysia didn't just continue its operations; it expanded them. It integrated states, connected people, and became a lifeline for communication and commerce across the nation. This transformation was driven by Malaysians who understood the unique needs and aspirations of our communities. Pos Malaysia stands as a testament to what we can achieve when we take charge of our destiny.

Similarly, Keretapi Tanah Melayu (KTM) has seen remarkable growth and improvement under Malaysian leadership. Once a railway system designed to serve colonial interests, KTM has been revitalized to support national development. Through strategic expansions and service enhancements, KTM now connects more regions than ever before, fostering economic growth and social integration. This progress didn't happen overnight. It was the result of visionary leadership and a committed workforce, all driven by a shared goal of making KTM a source of national pride.

MESSAGE FROM CILTM PRESIDENT PROFESSOR TS DR MUHAMMAD ZALY SHAH FCILT

Reflecting on our past, we see both triumphs and mistakes. Our struggle for independence taught us the value of resilience and the importance of learning from our experiences. We faced many obstacles but emerged stronger each time. By acknowledging our past challenges and celebrating our successes, we ensure that we remain vigilant and proactive. This mindset is crucial as we navigate the complexities of today's global economy. Our history reminds us that resilience and adaptability are key to maintaining our independence and achieving greater success.

Looking ahead, our vision for Malaysia's logistics and transportation industries is clear. We must continue to be resilient, innovative, and forward-thinking. We have proven in the past that we can overcome significant challenges. Now, we must channel that same spirit to march forward into a future of greater success. By building on our past achievements and addressing our past mistakes, we can ensure that our industries remain independent and competitive. Together, we can create a future where Malaysia's logistics and transportation sectors are not just leaders in the region, but exemplary models for the world.

As we celebrate this Hari Kebangsaan, let us remember our journey, honour our progress, and commit to a future of continued success and independence.

Prof. Dr. Muhammad Zaly Shah FCILT
President
CILT Malaysia

KEJARA Merit Demerit Point System can effectively Discipline Reckless Drivers and Riders

Drivers Merit Demerit Points System (DMDS) are used successfully by global leaders of road safety to discipline drivers and riders. An effectively run DMDS program is a great enabler for achieving good road safety outcomes.

Whenever a serious road crash happens and traffic enforcement agencies announce details that the driver involved had multiple outstanding traffic summonses the question on everyone's mind is why no action was taken to suspend his drivers license under the KEJARA driver merit demerit point system prior to the crash. Best practise dictates that action on reckless drivers/riders should be both preventive and reactive in nature before and after a road crash occurs to reach desired road safety goals of fatality and injury reduction and also critical safety gaps remedy after the road crash occurrence.

Effective and deterrent disciplinary action on reckless drivers, riders and repeat offenders is a fundamental requirement to help achieve fatality and injury reduction milestones set under the Malaysia Road Safety Plan 2022 – 2030.

If the strong arm of the law is used to discipline drivers and riders compelling them to obey critical traffic regulations such as speed compliance, traffic signals, safe overtaking, safe following distance, as well as road traffic signs and road markings, Malaysia will certainly witness a significant decline in road fatalities and injuries with an effective KEJARA System.

Industry Lead Body (ILB)

Safety Driving Centre (SDC)

As a long serving advocate for road safety, I am a great believer that an efficiently run system of rewarding good drivers and punishing repeat offenders through an effective KEJARA merit demerit points and driver license suspension system is the best way to govern, transform and change driver behaviour.

Datuk Suret Singh FCILT
Advisor, Safety Driving Centre
Group of Companies

Top performing countries for road safety such as Sweden, Norway, United Kingdom, New Zealand, Germany, USA, Australia, Japan all have a efficiently working driver merit demerit system notifying and rewarding good behaviour and punishing reckless drivers and riders with heavy fines as well as driver's license suspension.

Our KEJARA system was first launched in 1997 and revamped in 2017. One of the problems plaguing the effectiveness of the KEJARA system in Malaysia is the lack of integration between traffic summons data of PDRM and JPJ.

During my tenure as MIROS Chairman a new milestone was achieved as PDRM traffic summons data was directly linked to the KEJARA database in JPJ resulting in full consolidation of traffic summons data under the KEJARA database in JPJ. The follow up plan after establishing the vital datal-ink was to refine and integrate PDRM and JPJ data for accuracy and data gaps within a period of 6 months and to have a comprehensive KEJARA database on traffic summons within the set timeframe. Two years have gone by and there does not seem to be significant progress to suspend the 5 to 10 percent repeat offenders and reckless drivers and riders using KEJARA.

Industry Lead Body (ILB)

Safety Driving Centre (SDC)

Datuk Suret Singh FCILT
Advisor, Safety Driving Centre
Group of Companies

Probationary Drivers License (PDL) KEJARA database is working very well as PDL drivers and riders get their license suspended or revoked at 20 demerit points. However, for Competent Drivers Licenses (CDL) drivers and riders the progress of drivers/riders licenses suspension is very slow.

The success of the PDL license suspension program creating a strong deterrence on PDL drivers and riders should serve as the catalyst and role model to revamp and change the current governing structure enabling rapid suspension of CDL driver and rider licenses upon attaining KEJARA demerit point. If we are serious of having an effective and working KEJARA merit demerit points system for CDL drivers or riders licenses we need the successful PDL license KEJARA governing structure to be applied for CDL licenses as well.

CILTM SECTION ACTIVITIES PENANG SECTION

The Chairman of CILTM Penang Section, Prof. Dato' Logistician Chang Kah Loon, FCILT, FLogM, along with the Secretary, Log. Eunice Chang, CMILT, MLogM, and Treasurer, Log. Ts. Amy Ooi, FCILT, FLogM, had the honor of attending the Pacific International Lines (PIL) Rebranding Ceremony in Malaysia. The event was graced by numerous leaders in the logistics industry, including the CEO of Penang Port, the Head of Cargo Services at KTM, key personnel from The Society of Logisticians Malaysia (LogM), the President of the North Malaysia Shipping Agents Association (NMSAA), freight forwarders, and logisticians. Congrats to Pacific International Lines (PIL), Log. Christopher Lim, CMILT, MLogM, and their team for their successful rebranding in Malaysia!

CILTM Penang Section conducted the industrial visit in Penang, attended by the Section Treasurer, Log. Ts. Amy Ooi, FCILT, FLogM, and the Chairman of Penang Section Dato' Logistician Chang Kah Loon, FCILT, FLogM. During the visit, they discussed various topics, including technological advancements and developments related to Malaysia's LMW status, which supports industry growth. Dato' Chang also spoke on the importance of logistics, particularly in the maritime sector, emphasizing that it involves much more than sea transportation. He highlighted its significant role in global trade and encouraged further exploration of its wider impact on international commerce.

JOHOR SECTION

The Chartered Institute of Logistics and Transport (CILTM) Annual General Meeting (AGM) Johor Section was held recently at Universiti Kuala Lumpur, UniKL, MITEC Pasir Gudang Johor Bahru. Congratulations to Lt Col Mohd Ramzi Mohd Nor CMILT the new chairman of the CILTM Johor Section.

CILTM SECTION ACTIVITIES KUALA LUMPUR SECTION

9 August 2024 – Tn Hj Baharudin Kamarudin FCILT Chairman of CILTM Kuala Lumpur section was honored to attend UCMI Main campus Taman Batu Muda Batu Caves, KL ‘PSYCHOLOGY DAY’.

Thanks to Mohd Azlan Abu Bakar CMILT a Lecturer at UCMI & CILTM KL member.

Thanks also to Dr Saleha Idris Senior Lecturer Psychology Programme & Faculty of Management, Education & Humanities team members.

On 12th August 2024, the University College of MAIWP International (UCMI) and CILT KL Section had a highly productive meeting with the Malaysia Automotive Robotics & IoT Institute (MARii). The session was chaired by Deputy CEO Ts Nizmar Mohd Nazar, with key contributions from Mr. Naim of Strategic Corporate and Muhamad Nasrudin Bin Hashim, Head of Supply Chain Development.

The CILTM delegation, led by Hj Baharudin, included partners from SAF Logistics, Logisall, and D’Amante. The insightful discussions on potential collaborations promise to drive innovation and growth in our respective fields. They are excited about the possibilities ahead and are looking forward to turning these conversations into impactful partnerships.

CILTM SECTION ACTIVITIES

PAHANG SECTION

1 August 2024: Meet and Greet CILTM Pahang Section 2024. Dr. Kamarazaman Yacob FCILT Chairman of CILTM Pahang Section and Dato Ts (Dr.) Abd Radzak Abd Malek Honorary FCILT Patron of WiLAT Malaysia with Mr. Marvin Lee, Head of Business Development WCT Building Values. It was indeed a great discussion.

CILTM SECTION ACTIVITIES

SELANGOR SECTION

CILTM Selangor Section organized a Tea Talk session on Wednesday, July 31, 2024, at 2:45 pm at MISI Auditorium (Level 2), Bukit Jelutong. Mr. Anthony Pinto was invited to share his experience as a member of professional organizations.

NEXT GEN CILT MALAYSIA SUPPORTING THE INTERNATIONAL STUDENT EXCHANGE MOBILITY TO INDONESIA

From 1-14 August 2024, Next Gen CILT Malaysia is organizing an International Student Exchange Mobility program to Jakarta, featuring 10 students and 2 chartered members from CILT Malaysia. This initiative underscores the commitment of Next Gen CILT Malaysia to fostering global connections and professional development among future leaders in the logistics and transport sector.

The students and chartered members visited ITL Trisakti University, Bandung Institute of Technology (ITB) and Sepuluh Nopember Institute of Technology (ITS). These visits include a variety of academic and industry-focused activities. A key highlight of the program is the participation of a visiting lecturer, who will share insights and expertise with students and faculty members at the host institutions.

In addition to academic exchanges, the group engaged with the broader community through a media social podcast, where they discuss the latest trends and challenges in logistics and transport. This platform will allow students to connect with a wider audience, showcasing their experiences and perspectives on the global stage.

The program also includes a Corporate Social Responsibility (CSR) initiative, emphasizing the role of young professionals in contributing to societal well-being. By participating in CSR activities, the students will gain firsthand experience in implementing sustainable practices in the industry.

Finally, the visit will feature interactions with various industries, providing students with practical insights into the logistics and transport sectors in Indonesia. This will enable them to apply their academic knowledge in real-world contexts, enhancing their understanding of industry dynamics and best practices. This exchange program is a testament to the collaborative spirit of CILT Malaysia and its dedication to nurturing the next generation of leaders in the global logistics and transport industry.

Exploring Collaborative Opportunities with Yusen Logistics: A Step Forward for Next Generation CILTM

In a strategic move to enhance career opportunities for students and fresh graduates, Next Gen, CILT Malaysia recently held a productive meeting with Yusen Logistics to explore potential collaborations in internship placements and recruitment. The focus of the discussion was on integrating Yusen Logistics' expertise with CILT Malaysia-accredited programs, thereby providing students with real-world experience and better preparing them for the workforce.

Yusen Logistics, a global leader in supply chain and logistics services, expressed keen interest in partnering with CILT Malaysia to support the professional growth of the next generation. This collaboration aims to offer students hands-on experience through internships and placement opportunities that align with the evolving demands of the logistics industry. By engaging with a company that operates on a global scale, students will gain valuable insights into international logistics practices, enhancing their skills and employability.

The proposed partnership also includes recruitment initiatives for fresh graduates, giving them a platform to transition smoothly from academic life to professional careers. This initiative is particularly significant for graduates of CILT Malaysia-accredited programs, who will benefit from the opportunity to apply their knowledge in a practical setting, under the guidance of industry experts.

The meeting underscored the shared commitment of both CILT Malaysia and Yusen Logistics to nurturing the next generation of logistics professionals. By bridging the gap between academia and industry, this collaboration is set to contribute significantly to the professional landscape of logistics and supply chain management in Malaysia.

This partnership is more than just an opportunity for students and graduates; it represents a commitment to fostering a skilled and knowledgeable workforce that can drive the future of the logistics industry. We look forward to the successful implementation of this collaboration and the positive impact it will have on the careers of young professionals in Malaysia.

Elmina Crash Involving Hawker Beechcraft 390: Insights from a Licensed Aircraft Engineer

The tragic crash of the Hawker Beechcraft 390 in Elmina on 17th August 2023, has concluded with a definitive cause: the accidental deployment of the aircraft's spoilers. For Licensed Aircraft Engineers (LAEs), this finding highlights the intricate nature of aircraft systems and the critical importance of understanding how even a single malfunction can lead to catastrophic consequences.

Spoilers, typically used to reduce lift and assist in descent and landing, are designed to deploy in controlled situations. However, their unintended deployment, especially during critical phases of flight such as takeoff or cruising, can severely disrupt the aircraft's aerodynamics, leading to loss of control. This incident underscores the complexity of modern aircraft systems, where multiple components interact, and a failure in one area can have far-reaching effects.

For LAEs, the report serves as a stark reminder of the importance of rigorous inspection and maintenance routines. While the spoilers themselves might not be a common point of failure, this incident emphasizes the need for thorough system checks and a deep understanding of how different aircraft systems interact. It also highlights the importance of reviewing and understanding incident reports and manufacturer guidelines to stay informed about potential risks.

Furthermore, this tragic event underlines the role of LAEs in ensuring that all safety-critical systems are meticulously inspected and maintained. It also reinforces the necessity for ongoing education and training to keep pace with the complexities of modern aircraft systems.

As the aviation community absorbs the lessons from the Elmina crash, the findings will undoubtedly influence future maintenance practices and enhance the safety protocols that LAEs follow. The ultimate goal remains to prevent such tragedies by ensuring that all aircraft systems operate flawlessly, even in the most challenging conditions.

Airport Re-Generation: Pioneering Innovations in Modern Aviation

On August 28th, 2024, ID4A in collaboration with Sim Flight KL, Next Generation CILT Malaysia hosted a dynamic forum titled "Airport Re-Generation: Innovations in Modern Aviation," bringing together leading industry experts and academics. The event was held at Sim Flight KL, Subang Airport. The event provided a platform for in-depth discussions on the latest advancements in airport infrastructure and the transformative technologies reshaping the aviation industry. Attended by 30 professionals from various sectors, the forum highlighted key innovations such as smart airports, sustainable practices, and the integration of advanced technologies to enhance operational efficiency and passenger experience. Participants explored the challenges and opportunities presented by these innovations, emphasizing the importance of collaboration between industry and academia in driving future developments. The discussions underscored the need for airports to adapt to rapidly changing demands while remaining sustainable and technologically advanced. As the aviation industry continues to evolve, the insights gained from this forum will play a crucial role in guiding the next steps toward a more innovative and efficient aviation infrastructure.

Visit to Custom Agencies at KLIA Airport Terminal Operator, Akademi Kastam DI Raja Malaysia and Short Course for Shipping Agent Certificate

64 students and one lecturer conducted an industry visit to the Customs sector and participated in the Ship Agent Certification training at the Royal Malaysian Customs Department Academy. This visit was fully sponsored by the Maritime Management Student Trust Fund (CILT). The purpose of this visit and the short course was not just to provide students with practical visibility in air forwarding companies and to observe the methods of customs clearance for goods and cargo at the KLIA air cargo terminal, but also to equip them with the skills and knowledge necessary for their future careers.

As a result, students will not only understand how the concepts learned in lectures are applied in the field, but they will also be able to apply these concepts in their respective careers. Furthermore, to ensure that students develop high-level skills, the Customs and Cross-Border Regulations course, which they studied for 14 weeks, will be translated into this short-term training. It will be followed by a mandatory examination for the Ship Agent Certificate, recognized as equivalent to a Bachelor's degree.

It is important to note that this certificate and training have been introduced through this course to Maritime Management students since 2018. Now, Bachelor of Maritime Management program students can apply for positions in Customs and MAQIS (Malaysian Quarantine and Inspection Services) through the Public Service Commission. Graduates of this course have been offered positions in cargo and forwarding companies in the land, air, and sea transportation sectors. Congratulations to Year 3 of the Maritime Management Program students!

DIMERCO EXPRESS SDN BHD, KLIA CARGO TERMINAL

MAS CARGO, KLIA CARGO TERMINAL

DON'T STOP UNTIL YOU'RE PROUD

NextGen

To be the leading Logistics & Transport for Young Professionals Network in Malaysia

Terengganu

On the first day of the visit, the students were taken to two organizations, Dimerco Express Sdn. Bhd and MAS Cargo are both located in the KLIA Cargo Terminal area. The purpose was to expose the students to the operations of air cargo handling and the customs declaration processes carried out by both transport companies. As a result, the students understood the methods and practices of declarations in the aviation sector, which has similarities with the shipping sector.

GTR , KLIA CARGO TERMINAL

On the second day, the students were taken to GTR Logistics, a subsidiary of AirAsia that handles cargo operations. GTR is a highly active company in cargo and goods handling operations, consistently practising compliance and integrity with customs declarations. To understand the enforcement of inspections for imported goods related to plants and animals, the students were also brought to the Malaysian Quarantine and Inspection Services. The purpose was to expose the students to the enforcement operations and compliance with regulations controlling these goods, ensuring the safety and well-being of imported items at the air border entry points.

GTR Logistics

DON'T STOP UNTIL YOU'RE PROUD

NextGen

To be the leading Logistics & Transport for Young Professionals Network in Malaysia

Terengganu

Next, the students went to Universiti Teknikal Malaysia Melaka (UTEM) to attend a two-day customs course that imparts in-depth and specialized customs knowledge. Through this two-day course program, the students were again given additional customs knowledge as a valuable enhancement. On the final day, the students took the Customs Shipping Agent Certificate examination, fully conducted by the Royal Malaysian Customs Academy with course coordination by UTEM Holding. Congratulations to the Maritime Management students who participated in this program and effectively grasped the concepts and practices of customs knowledge. As a result, through the Customs and Cross-Border Regulations course, students will apply this knowledge during their Industrial Training and in their respective careers within the "Custom Brokerage" field. Congratulations!
